

BIENNIAL REPORT  
STATE SUPERINTENDENT  
FLORIDA

•  
1938-40

**BIENNIAL REPORT**

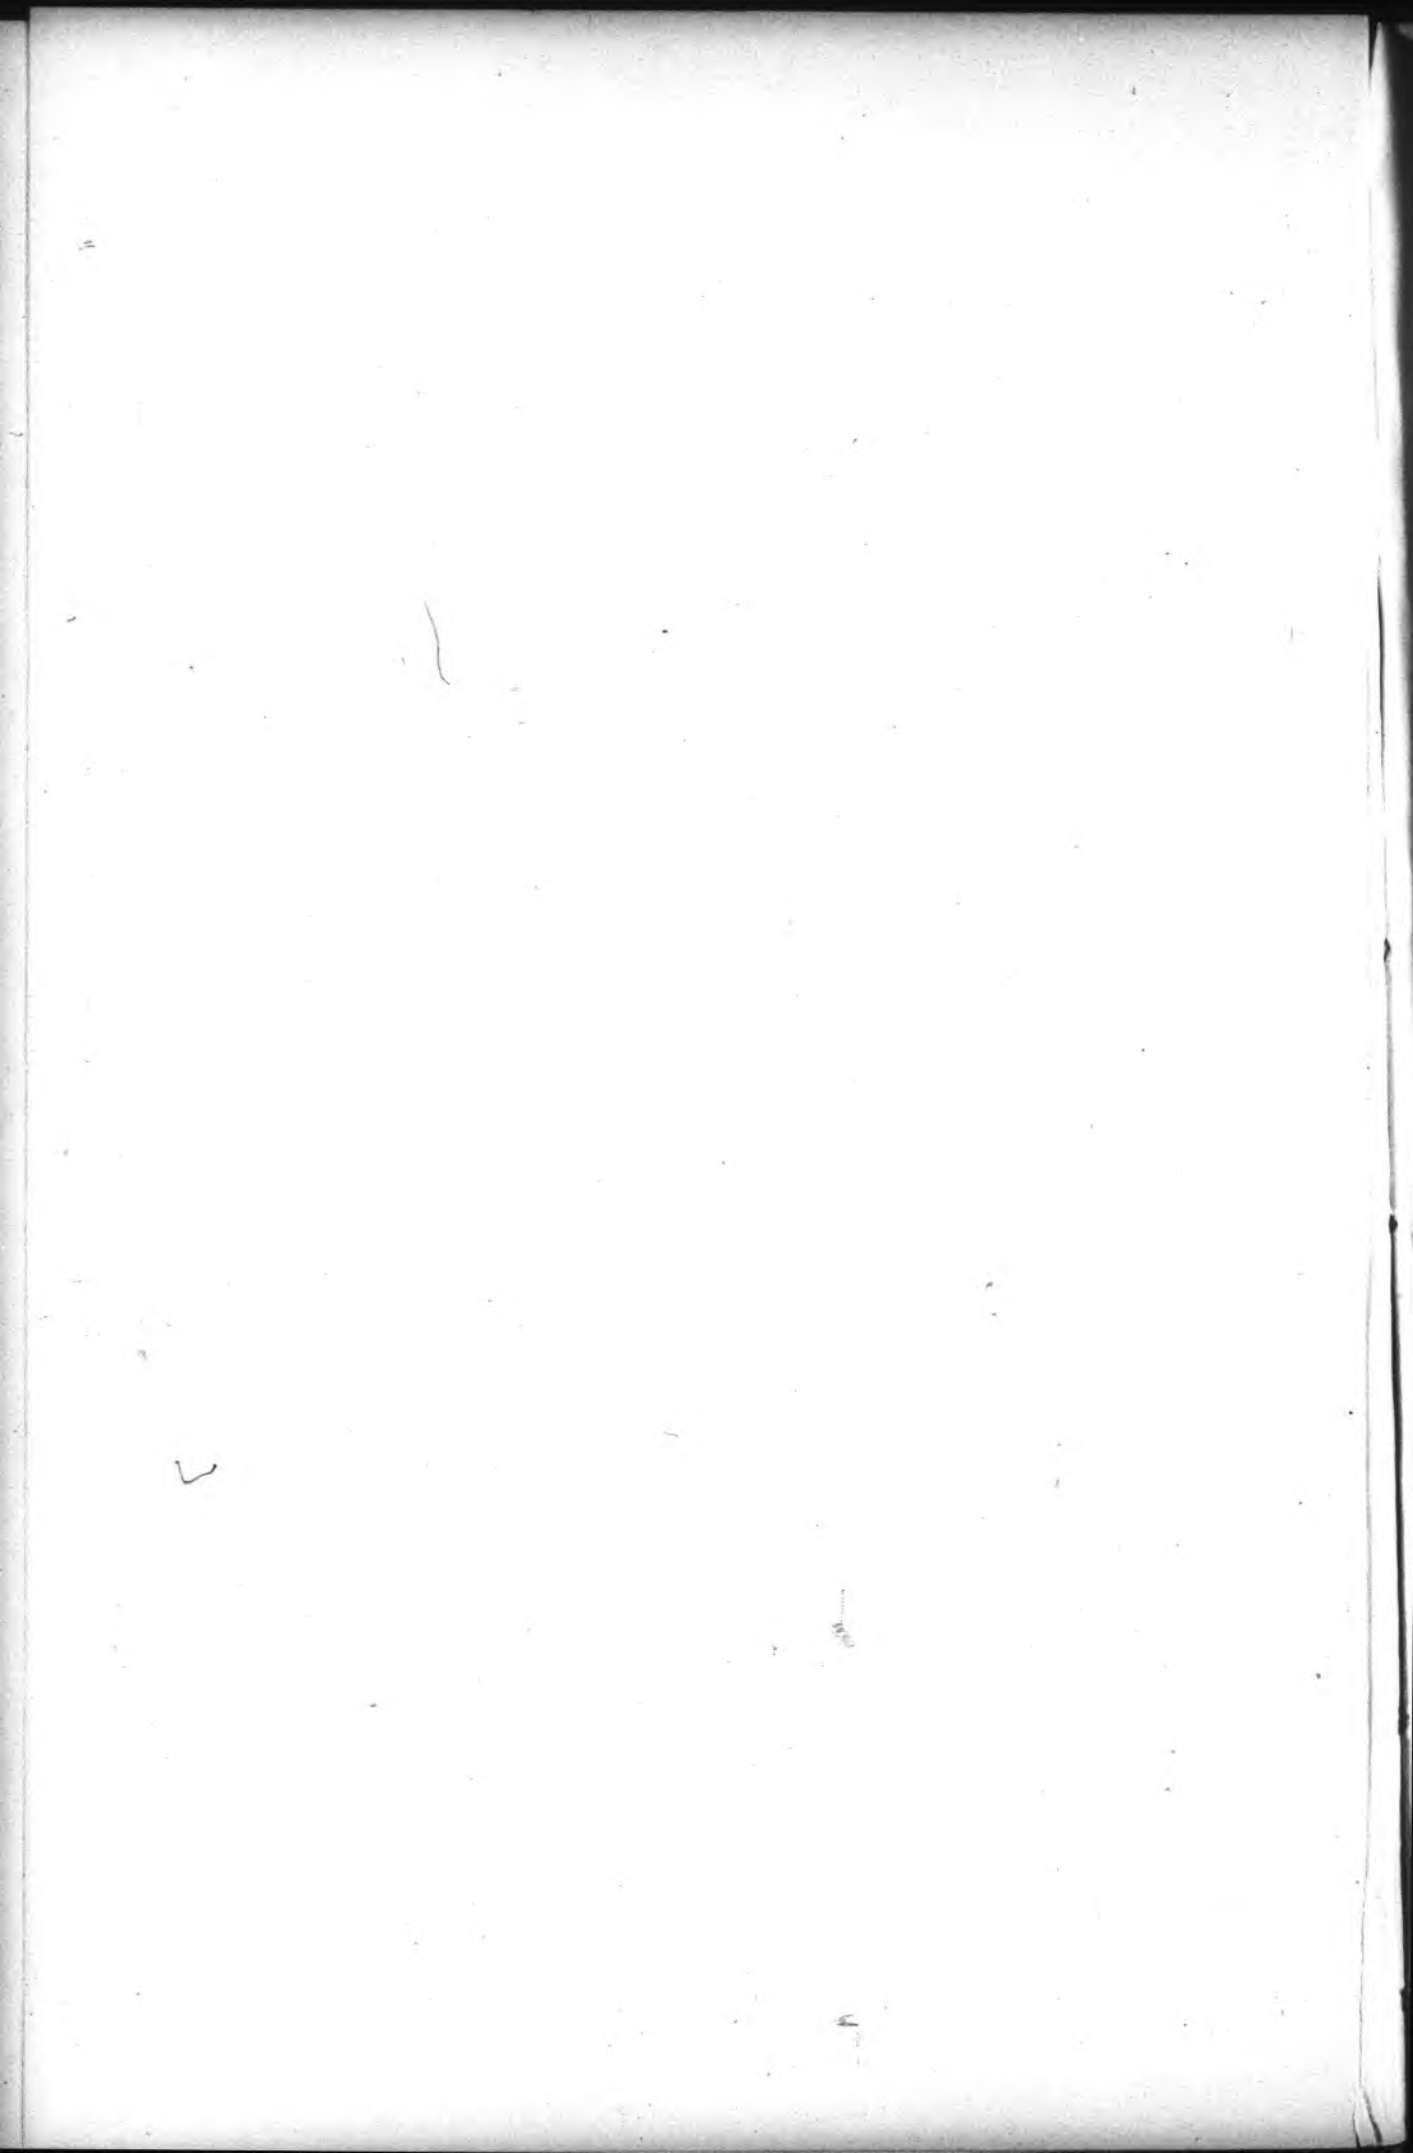

**Superintendent**  
**OF**  
**Public Instruction**

**STATE OF FLORIDA**

**For the Fiscal Years Beginning July 1, 1938,  
and Ending June 30, 1940**

**COLIN ENGLISH**  
**State Superintendent of Public Instruction**  
**Tallahassee, Fla.**

## **LETTER OF TRANSMITTAL**

---

State Department of Education

Tallahassee, Florida,  
January 6, 1941.

To His Excellency,  
Fred P. Cone,  
Governor of Florida.

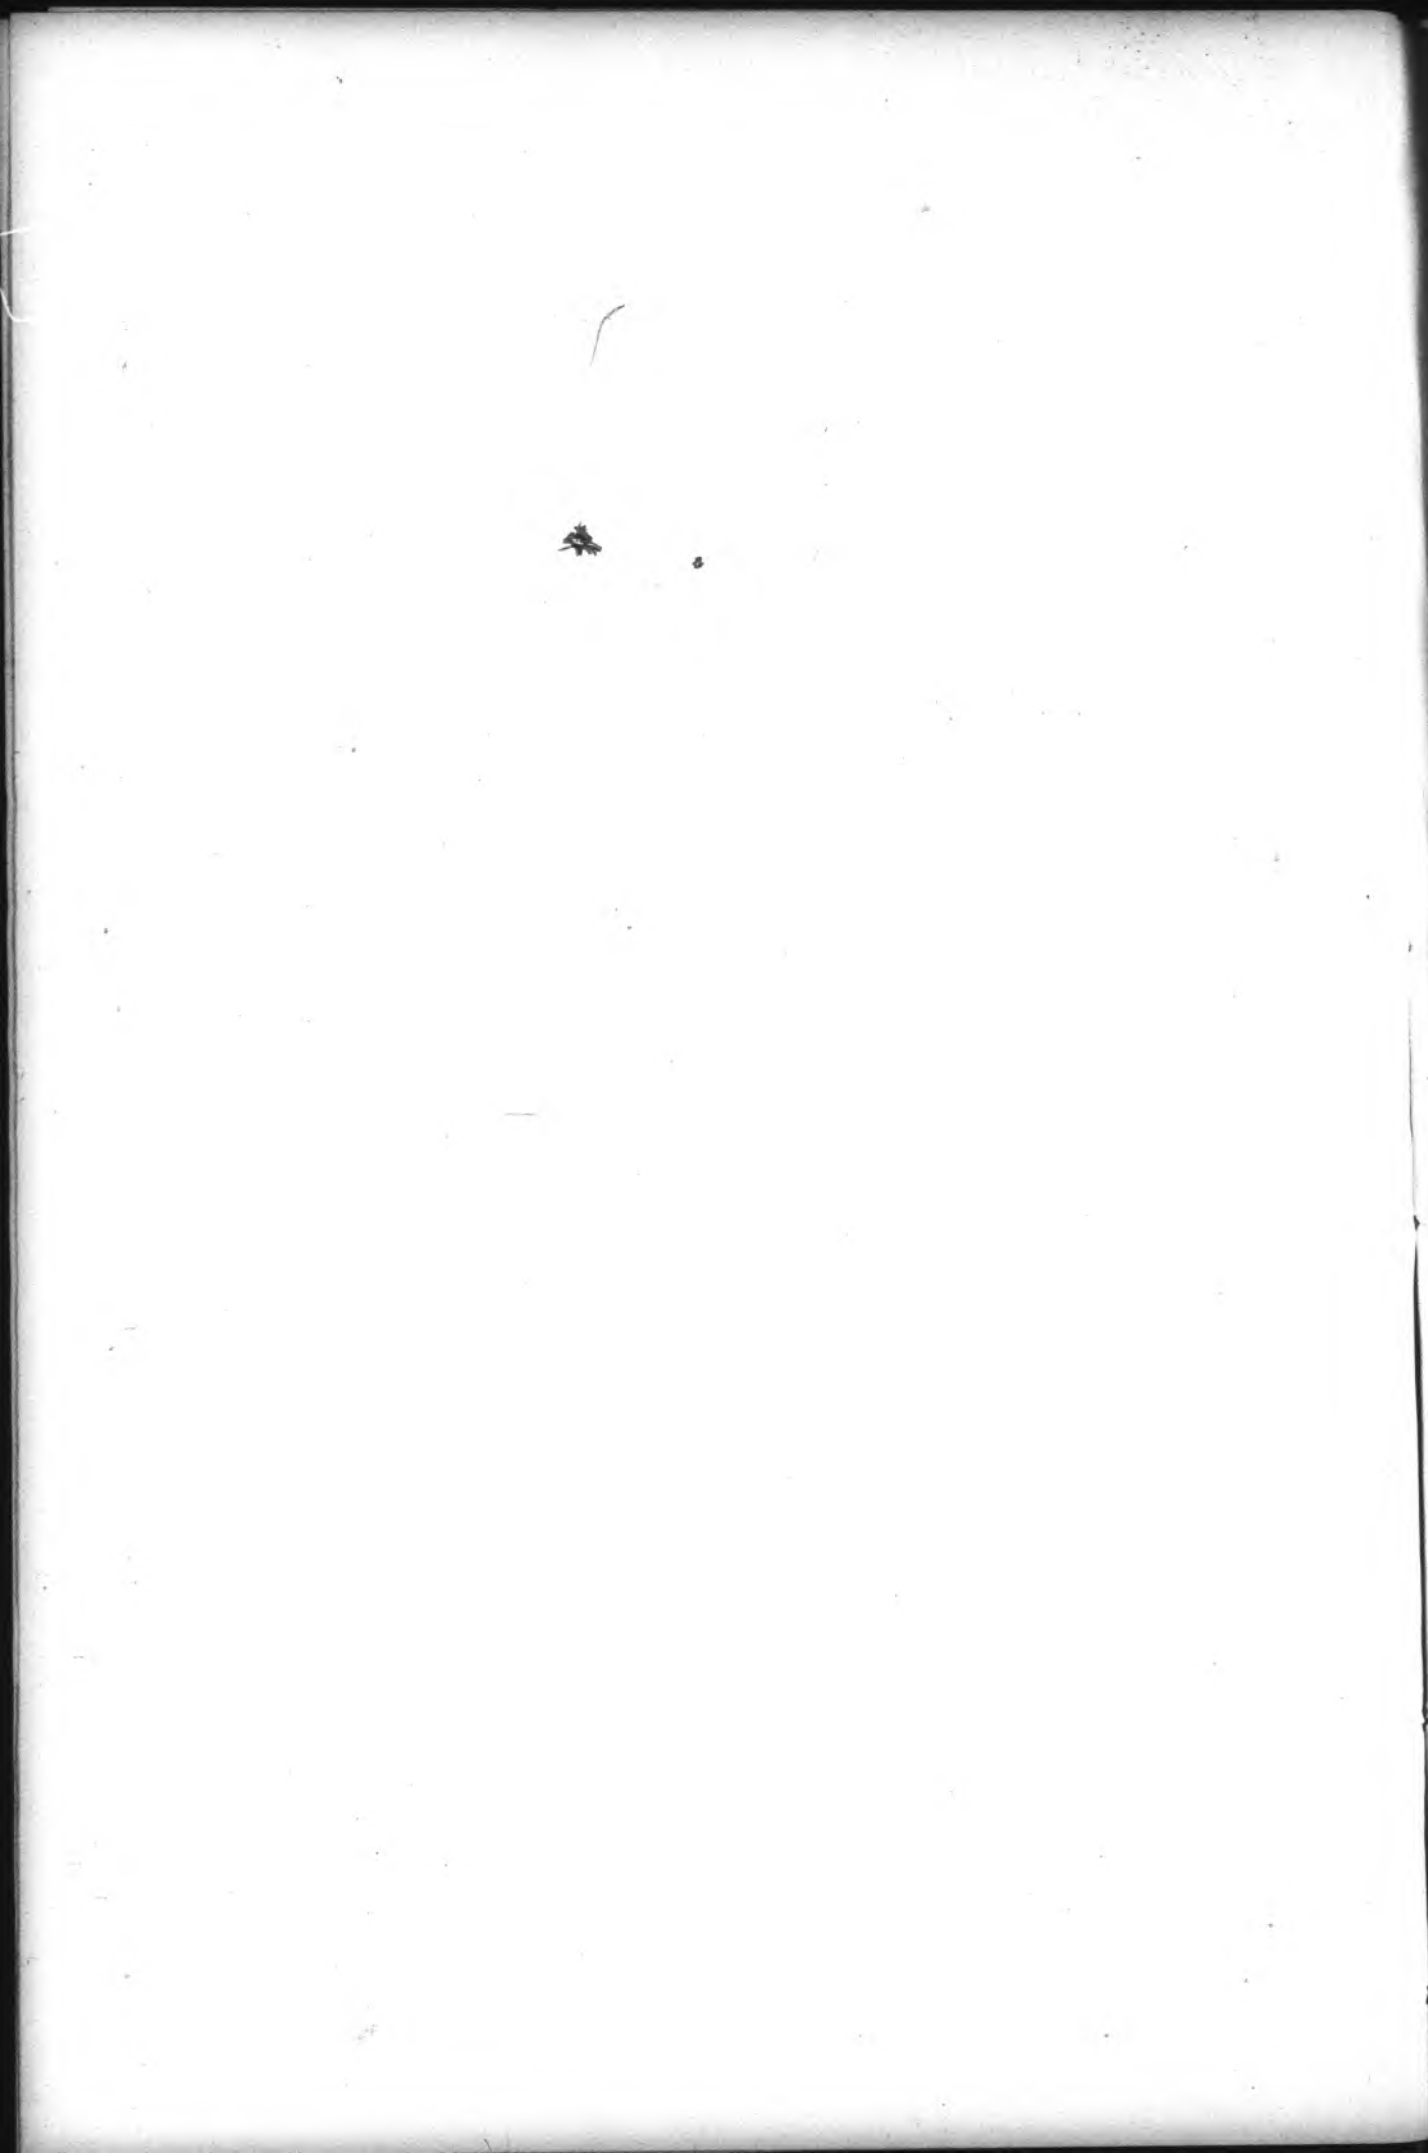

Sir:

In compliance with Section 27, Article IV, of the Constitution of Florida, I have the honor to submit herewith the Biennial Report of the State Department of Education for the two years beginning July 1, 1938, and ending June 30, 1940.

Yours respectfully,

COLIN ENGLISH,

State Superintendent of Public Instruction.

## STATE BOARD OF EDUCATION

- \*Hon. Fred P. Cone, Governor, President
- †Spessard L. Holland, Governor-elect
- \*\*Hon. R. A. Gray, Secretary of State
- \*Hon. George Couper Gibbs, Attorney-General
- †J. Tom Watson, Attorney-General-elect
- \*Hon. W. V. Knott, State Treasurer
- †J. Edwin Larson, State Treasurer-elect
- \*\*Hon. Colin English, State Superintendent of Public Instruction, Secretary

## STATE BOARD OF CONTROL

Hon. H. P. Adair, Jacksonville  
Hon. R. H. Gore, Ft. Lauderdale  
Hon. Chas. P. Helfenstein (Resigned October 1, 1940), Live Oak  
Hon. T. T. Scott (Appointed October 7, 1940), Live Oak  
Hon. N. B. Jordan, Quincy  
Hon. M. W. Palmer, Ocala  
J. T. Diamond, Secretary, Tallahassee

## STATE INSTITUTIONS OF HIGHER LEARNING

University of Florida—Dr. John J. Tigert, President, Gainesville  
Florida State College for Women—Dr. Edward Conradi, President, Tallahassee  
Florida A. & M. College for Negroes—Dr. J. R. Lee, President, Tallahassee

## OTHER STATE SCHOOLS

Florida State School for Deaf and Blind—Dr. Clarence J. Settles, President, St. Augustine  
Industrial School for Boys (Delinquent)—Millard Davidson, Superintendent, Marianna  
Industrial School for Girls (Delinquent)—Mrs. Lola G. Skipper, Superintendent, Ocala

## FLORIDA EDUCATION ASSOCIATION

- \*\*\*James T. Wilson, President, Miami
- Miss Marguerite Morse, President-elect, Clearwater
- \*\*\*T. D. Bailey, Vice-President, Ocala
- James T. Wilson, Vice-President-elect, Miami
- J. S. Rickards, Secretary and Treasurer, Tallahassee

\*Completes term of office January 7, 1941

†Begins term of office January 7, 1941

\*\*Re-elected

\*\*\*Completed term of office June 30, 1940

**STAFF MEMBERS  
OF  
STATE DEPARTMENT OF EDUCATION  
Tallahassee**

COLIN ENGLISH, State Superintendent

Mrs. Alice Chambers, Secretary

**Division of Administration and Finance**

Edgar L. Morphet, Director

R. M. Evans, Finance Advisor and Statistician

James L. Graham, School Plant Planning Service

James A. Stripling, School Architect

T. George Walker, Manager State Textbook Service, Supervisor  
of Transportation

**Division of Instruction**

M. W. Carothers, Director

Mrs. Dorothy Sauls, Secretary

M. L. Stone, Curriculum Director

W. T. Edwards, Assistant Curriculum Director

Joe Hall, Supervisor of Certification, Consultant in Health and  
Physical Education

Paul Eddy, Supervisor of School Evaluation, Editor of Department  
Publications

Robert D. Dolley, Supervisor of Trade and Industrial Education

J. F. Williams, Supervisor of Agricultural Education

Claud M. Andrews, Supervisor of Vocational Rehabilitation

Miss Boletha Frojen, Supervisor of Home Economics

D. E. Williams, State Agent for Negro Education

## REGISTER OF STATE SUPERINTENDENTS

	Term Began
C. Thurston Chase.....	August, 1868
Rev. Charles Beecher.....	March 18, 1871
Jonathan C. Gibbs (colored).....	January 23, 1873
Samuel B. McLin, Secretary of State and Acting State Superintendent.....	August 17, 1874
Rev. William Watkin Hicks.....	March 1, 1875
William P. Haisley.....	January 6, 1877
Eleazer K. Foster.....	January 31, 1881
Albert J. Russell.....	February 21, 1884
William N. Sheats.....	January 3, 1893
William M. Holloway.....	January 3, 1905
William N. Sheats.....	January 7, 1913
W. S. Cawthon.....	July 24, 1922
Colin English.....	January 5, 1937

## COUNTY SUPERINTENDENTS OF PUBLIC INSTRUCTION

(Terms Expire January, 1945)

COUNTY	NAME	COUNTY SEAT
Alachua.....	*Horace F. Zetrouer	
	**Howard W. Bishop.....	Gainesville
Baker.....	J. D. Burnsed.....	Macclenny
Bay.....	*A. L. Hardy	
	**M. M. Mashburn.....	Panama City
Bradford.....	W. E. Middleton.....	Starke
Brevard.....	Damon Hutzler.....	Titusville
Broward.....	Ulric J. Bennett.....	Ft. Lauderdale
Calhoun.....	George Atkins.....	Blountstown
Charlotte.....	Miss Sallie Jones.....	Punta Gorda

## PART I

# MAJOR TRENDS AND DEVELOPMENTS IN FLORIDA EDUCATION

### THE PRESENT SITUATION

Within the past few months, conditions in Florida, as well as throughout the Nation, have changed remarkably. We are no longer living in a world of peace in which the role of Democracy is accepted and understood. Instead, we are living in a world of chaos. War pressed by ruthless dictators has come ever closer to our shores. Democracies are no longer safe. Their very existence is challenged. What will the developments of the next few months bring? What further changes are in store for us? No one knows at present, but everyone is beginning to realize the seriousness of the situation now confronting us.

Recent developments bring before us more clearly than ever before the need for a better educational program. Democracies depend upon education, because decisions must be made by the voters. To the extent that those decisions are wrong, Democracies are weakened. In this crisis and during coming years, decisions must be increasingly right. That means that voters must be better and better educated; must be in increasingly better position to understand and to judge the issues before them.

In the future, the schools must play an increasingly important role in the life of the Nation. We must not only continue to educate, but we must do a better job than has ever been done before. We must study the entire educational process to determine those aspects which need strengthening and take immediate steps to see that they are strengthened.

During recent years, many improvements have been made in Florida schools through the cooperative efforts of interested citizens and school leaders. That program of improvement is by no means ended. In fact, it has only begun. We must study more seriously present trends and their significance for the schools. We must analyze more carefully the entire school program in order to make needed adjustments.

This brief report is devoted to a summary of some of the major trends in education in Florida during the past biennium and to an indication of some of the problems that will need to be solved in the immediate future.

### THE FLORIDA SCHOOL CODE

Previous reports have called attention to the splendid work of the Florida School Code Committee and to the Report of that committee. Attention has also been invited to the fact that the 1937 Legislature adopted an act requiring the preparation of a new School Code to be submitted to the 1939 Legislature.

During the past biennium, this work has been completed in cooperation with the Special Legislative Committee on Revision and Codification of School Laws. As required by the 1937 Act, the proposed School Code was prepared, was submitted to the 1939 Legislature by the Legislative Committee, and was adopted in revised form by that Legislature with only six dissenting votes. On July 1, 1939, the School Code became law. Thus, all the old conflicts in school laws have been removed, and the school program can move forward on the sound basis established by the Florida School Code. The school code has been published, together with laws relating to Institutions of Higher Learning and miscellaneous laws relating to education, under the title, *Florida School Laws, 1939*. The School Code is recognized as one of the most satisfactory and up-to-date in the country and has proven very helpful in planning and carrying forward many needed improvements in education in the State.

### FLORIDA AND SOUTHERN STATES WORK-CONFERENCE ON SCHOOL ADMINISTRATIVE PROBLEMS

During June of 1940, representatives from most of the Southern States joined with committees from Florida to carry on studies in three fields. The meeting was held at Daytona Beach, Florida. As a result of the Work-Conference, bulletins were prepared on *School Plant Operation and Maintenance in Southern States*, *Pupil Transportation for the Southern States*, and *Continuity of Service for Teachers in the Southern States*. These bulletins are in the nature of handbooks which are designed to be of benefit to each of the Southern States.

The Florida committees, consisting chiefly of graduate students, carried on their work for another four weeks at Gainesville, in order to complete the preparation of a series of handbooks dealing with problems in the field of school administration. It was the purpose of these committees to prepare handbooks which would present the best practices for various groups of school officials and thus supplement the school laws.

The Florida committees carried on their work under the direction of an advisory staff, consisting partly of representatives from the State Department of Education. On two occasions, an advisory committee consisting of county board members, county superintendents, trustees, and principals, met with each Work-Conference committee to assist in shaping up the bulletins or handbooks. As a result of the work of these committees, handbooks are being published in each of the following fields:

*Handbook for County Board Members*  
*Handbook for County Superintendents*  
*Handbook for School District Trustees*  
*Handbook for Principals*  
*Handbook on Pupil Transportation in Florida*  
*Handbook on School Plant Operation and Maintenance in Florida*

There are also two bulletins dealing with administrative problems relating to teacher personnel, as follows:

*Continuity of Service for Teachers in Florida*  
*Providing Better Teachers for Florida Schools*

These handbooks and bulletins are intended to suggest procedures which would represent a major improvement over present practices in various areas. The procedures proposed in the handbooks should constitute the standards for these aspects of school administration in Florida during coming years.

Plans for further Florida work-conference projects for the summer of 1941 call for special studies in three areas. Those areas are as follows:

(1) *School Attendance.* A committee of some twenty people, most of whom will be working in the school attendance field, will study the entire problem carefully and will prepare a handbook

or bulletin for guidance in solving school attendance problems in Florida.

(2) *School Financial Management.* This committee will be comprised of some fifteen persons who will explore the entire field of school finance in Florida and will then develop a handbook or manual dealing with school financial accounting, budgetary procedure, and other State financial problems.

(3) *Supply Management.* A committee of from twenty to twenty-five persons will study all phases of supply management and will prepare a handbook which will include suggestions for purchase, storage, distribution, conservation, and accounting for supplies. The problems of supply budgeting and distribution to schools will also be considered. The handbook should include specifications which should aid greatly in the purchase of supplies which meet desirable requirements.

### IMPROVEMENT OF INSTRUCTION

During the past biennium rapid progress has been made in solving many of the instructional problems facing the schools of Florida. The Program for Improvement of Instruction on a state-wide basis has included both an intensive and an extensive attack. With respect to the intensive phase of the work, co-operative arrangements have been effected which have made available to a limited number of total faculty groups workshop facilities and certain other services of value to public schools in reorganizing their curricula. The extensive phase of the program for improving instruction has been characterized by the publication and study of many instructional bulletins of general interest. These bulletins will be described later in this report.

#### *The Florida Workshop Program*

An outstanding phase of the Florida program for the improvement of instruction has been the cooperative work of the State Department of Education, the College of Education and the P. K. Yonge Laboratory School of the University of Florida, the School of Education and the Demonstration School of the Florida State College for Women, and the entire faculties of twenty-eight Florida elementary and secondary schools. Known as Co-operating schools of the Florida program, these schools have attempted to identify

their problems and needs, and to work toward satisfactory solutions of them. At the teacher-training institutions during the first term of each summer session, facilities have been provided for an intensive study of the problems which the staff members of the Co-operating schools have identified. Follow-up service, consisting of three or more visits of not less than two to four days, has been provided through the assignment of State department and college staff members to this particular work. The first workshop for the Florida Cooperative Schools was held at the University of Florida during the summer of 1939. During the school year of 1939-40 a larger number of schools volunteered, and workshops were held both at the Florida State College for Women and the University of Florida. During the 1941 summer session it is planned to hold similar workshops at the two State Institutions and also at the University of Miami. Written records of the experiences of these co-operating school groups have been kept and a thorough evaluation of the progress made is contemplated. In addition, a bulletin has been prepared which contains brief accounts of the experiences of these schools. This bulletin is listed among the materials cited in a succeeding section of this report.

### *Bulletin Production Groups*

In addition to the large number of teachers and principals who have participated in the workshop program, many others have served on various committees charged with the responsibility for producing curriculum guides of general interest to teachers. The participants have been drawn from almost every section of the State, and county boards have willingly cooperated in providing small stipends to cover part of the expenses of the committee members. Staff members of the State Institutions, together with outstanding educators from outside Florida, have given assistance in the preparation of this material. The following is a list of the instructional materials which have been prepared prior to June, 1940: No. 1. *Guide to Exploratory Work*; No. 2. *Ways to Better Instruction in Florida Schools*; No. 3. *Preliminary Guide to a Study of the Elementary Curriculum in Florida*; No. 4. *Plans in Florida's School Health Program*; No. 5. *Physical Education for Secondary Schools*; No. 6. *Planning Curriculum Study with Local Groups*; No. 7. *Suggestions for Teaching the Effects of Narcotics and Stimulants*; No. 8. *A Suggested Library Book List for Florida Schools*.

The following bulletins were developed during the 1940 summer session: No. 9. *A Guide to Improved Practice in Florida Elementary Schools*; No. 10. *A Guide to a Functional Program in the Secondary School*; No. 11. *Tentative Source Materials in Business Education*; No. 12. *Tentative Source Materials in Industrial Arts for Florida Secondary Schools*; No. 21. *Tentative Source Materials in Physical Education in the Elementary School*; No. 22. *Source Units in Health Education*; No. 23. *Florida Cooperating Schools*. In addition to these are the following bulletins: *The Elementary Technology Series*; *Outline of Technological Applications in High School Mathematics*; *Avenues of Understanding* (A Bulletin for Parents and Lay Groups); and *Bible Reading in Florida Public Schools*.

It is planned to continue the development of curriculum materials during the coming biennium, and arrangements have already been made to have several committees at work during the 1941 summer session at the two State Institutions of higher learning. At the Florida State College for Women two committees will prepare (1) Materials in the Field of Elementary School Arithmetic, (2) Plans for Improved School-Community Recreation. At the University of Florida committees will work on three projects: (1) Source Materials in the Field of Social Studies, (2) Enlarged Library Book List for Elementary and Secondary Schools, and (3) Recommendations Concerning the Purchase and Use of Multi-sensory Aids. In addition to the committee work, it seems advisable to continue the emphasis upon the study of these materials by local faculty groups. During the 1939-40 session and again during the 1940-41 session, approximately 450 faculty groups have given consideration to these materials in connection with their professional study meetings. Certain schools have also participated in the try-out of some of the courses of study which have been prepared.

### *Teacher Education and Certification*

Closely related to the general curriculum development in the State is the improvement of teachers in service. In fact the curriculum development program may be thought of as only one phase of a larger program for improvement of teachers through in-service training. Institutions of higher learning preparing teachers have been active during the biennium in the improvement of their teacher education programs. Two advisory councils made up of representatives of the teacher education institutions have worked with the

State Department on problems relating to the preparation of white teachers and of Negro teachers, respectively.

In February, 1940, these institutions decided to engage individually in evaluations of their programs and the work out jointly plans for a state-wide system of internships, or practice teaching opportunities in public school teaching situations. A request was made to the Commission on Education of the American Council on Education for consultative and financial assistance in making these studies and developing plans. The Commission on Teacher Education has promised limited assistance. The current biennium promises to be a period of unusual activity and progress in the teacher education field.

Conferences have been held during the past biennium with representatives from the institutions of higher learning, the State Department, and the public schools participating. These conferences have led to certain revisions in requirements for certificates based upon college training. New bulletins dealing with all phases of certification have been released. In keeping with the provisions of the code, certain changes have been made with reference to the special examination type of certificate. The general level of requirements for certification under the examination plan have been raised so as to give certificates of this type a higher standing from the professional point of view. The trend toward certification upon the basis of college training, rather than upon the basis of examination, has continued to a point where the examination-type certificate may soon be abolished without undue hardship either to the schools or to the individuals concerned. Examinations are no longer given in each of the county seats, but have been restricted to certain centers distributed throughout the state, including the following counties: Alachua, Dade, Duval, Hillsborough, Lee, Leon, St. Lucie, Volusia, and Walton.

### *Health and Physical Education*

Special attention has been given to the subjects of health education and physical education. In the light of certain demands created by the present national emergency special effort has been made to emphasize the need for this work in the public schools of the State. Conferences have been held at which representatives from the many organizations interested in improving the health

and physical fitness of children and adults were in attendance. Aids designed to assist teachers in improving their plans in these fields have been prepared. Curriculum bulletins dealing with the teaching of physical education and health education are now being used extensively in the public schools. In addition, textbook adoptions have been made covering every phase of health education from the primary to the senior high school level. Special suggestions with regard to alcohol and narcotic education have also been published. Definite recommendations have been made, both by the Department and by the Courses of Study Committee with regard to the need not only for developing habits of healthful living among the pupils, but also for increasing their general physical stamina. Workshops for teachers of health education, physical education, and recreation, have been held at the two state institutions of higher learning.

### *Defense Education*

Under the direction of a staff member of the State Department of Education materials designed to assist teachers in preparing students for work in defense and war projects have been prepared. A five-book series on "Elementary Technology" has been designed to aid secondary school teachers in seeing the relationship between the principles of physics and mathematics and the practical applications of these sciences in everyday living and in defense work. Workshop facilities at several of the institutions of higher learning are being provided in order that teachers may gain first-hand experiences with the laboratory application of general mathematical and scientific principles. Special courses have been introduced at the senior high school level, which are designed to acquaint students, particularly boys, with the basic knowledge necessary for satisfactory employment in defense industries. All of these projects have received the unqualified endorsement of state civic groups and military authorities.

### *School Recognition*

Important changes have been made in the procedures for accreditation of schools. The new plan is set forth in "Report of School Analysis and Plans for Improvement, 1940-41." A recent ruling by the State Board of Education makes it obligatory that all schools analyze their school facilities and school program in the light of the analysis form. This should result in great improvement

in those schools which formerly considered themselves ineligible for accreditation and which therefore frequently made little effort to analyze their situation with a view toward improvement. Certain changes in other report forms have been made which will facilitate the gathering of data of great significance to the general administration and control of schools. Staff members of the department have given assistance in interpretation and application of the standards set forth and points deserving immediate attention have been brought to the attention of local school authorities. Since both advanced and essential items have been included, schools at all levels of attainment will be able to use the analysis form not only in making an evaluation of their present effort but also in measuring their progress over a period of years.

### *Negro Schools*

The Negro schools have improved during the biennium. The improvement has been much greater in some counties than in others, and much greater in some phases than in others. The improvement has been mostly in housing, equipment, beautification, sanitation, teaching procedures, pupil promotion, training of teachers, and direction of school work. However, hundreds of classrooms are still needed to house adequately Negro school children; additional equipment and supplies are also needed.

*School Plants:* During the biennium many counties have improved the schoolhouses, equipment, water supply and toilet facilities in the schools for Negroes. Many counties have made little or no improvement in the facilities for Negro schools. Those counties which have improved and increased the facilities for schools for Negroes have received financial assistance from Federal agencies. This assistance has been available to all counties. Many county officials have stated that county funds have not been available for securing Federal aid for improving school plants for Negroes. It is believed that regardless of the financial condition of counties through judicious use of their funds and Federal aid they can provide necessary school facilities for all children of both races.

*Consolidation and Transportation:* Negroes comprise about thirty per cent of the population of Florida. It would be expected that about thirty per cent of the school centers in Florida would be for Negroes. Actually, 1115 school centers are provided for

white children and 986 school centers are provided for Negro children. This disproportion of school centers is due to consolidation and transportation provided for white children, and not provided proportionately for Negro children. Consolidation of schools and transportation of children will not solve all the educational problems in schools for Negroes. However, if these provisions are good for white children it seems that they should be proportionately as good for Negro children. It is recommended that consolidation of schools for Negroes and transportation for Negro children be developed on the same basis as they have been developed for white children. It is recommended that county-wide transportation to high schools be initiated immediately.

*Elementary Schools:* The elementary schools have about 75 per cent of the enrollment. These schools range in size from one-teacher rural schools to the large urban schools. The distribution of elementary schools according to teachers was as follows in 1939-40:

No. of Teachers	_____	1	2	3	4	5	6-9	10 or more	Total
No. of Schools	_____	478	216	90	52	17	49	40	942

The teachers in the one-teacher schools teach children in six or eight grades. The teachers in the other small schools teach several grades. The small schools are the most poorly housed and equipped. Naturally, the work in these schools is much more difficult than the work in the larger schools. In addition to the difficulty of the work in the smaller schools the teachers have difficulty in finding satisfactory places to live in the communities. Many teachers solve this problem by living in town and commuting. As a result, the teachers do not become a part of the community and the school fails to serve the community as it should. One noteworthy advance made in the elementary schools has been the rapid decrease of the failure rate among first grade children. Negro teachers are now working on the assumption that normal children should complete one grade each year.

*Secondary Schools:* For the most part the curriculum for the secondary school is traditional. It has been classified as college preparatory. Several forces contribute to the continuation of this curriculum and teacher training institutions are continuing to provide trainees with training for teaching the present curriculum. The State provides salaries for teachers and textbooks for children

so that local units need to provide only the classrooms, desks and blackboards. Local school officials give lip-service to other types of curricula offerings but since the provision of other types of training would cost money locally, little change is made. High schools need to teach reading, behavior, habits of study and work, health knowledge and habits, vocational training, and social studies. Approximately 25 per cent of the Negro children enrolled in school are in the junior and senior high school. The percentage is steadily increasing. A very small percentage of the high school enrollment graduates, and a much smaller percentage goes to college. The high school needs to focus its attention on the larger percentage that does not go to college.

*Colleges and Extension Work:* There are four colleges for Negroes in Florida. One is a public senior college and the other three are private junior colleges. The senior college and two of the junior colleges are approved for the certification of graduates to teach in the public schools of the State. All of the colleges devote most of their efforts to the training of teachers. The curriculum for training elementary teachers is basically the same as in all of the colleges and is largely determined by the state certificate requirements. The curriculum needs to be adjusted to provide teachers with special preparation for teaching in small elementary schools. The curriculum for training teachers for high schools needs to be adjusted to what needs to be taught in the high schools and the way it is to be taught. The present procedure of preparing teachers to teach the traditional high school subjects in the traditional manner is almost completely divorced from the needs of Negro children. The present extension work is done to enable teachers to earn credit toward graduation. The enrollees bear the expense of extension work by paying fees. The State bears no expense for extension work. This type of extension work is serving the needs of teachers who desire and need credits toward graduation. Only indirectly and slightly does it influence the improvement of the educational program.

*Supervision:* Many people have the concept that teachers have the knowledge, skill, character and habits of work to teach school successfully without assistance, stimulation, guidance or direction. Negro schools and teachers need direction and guidance. Many counties have provided this direction by employing either super-

visors or Jeanes teachers. During the biennium supervision was provided for Negro schools in 52 per cent of the counties, 79 per cent of the school centers, 82 per cent of the teachers and 84 per cent of the children. This supervision needs to be improved and increased.

### *Agricultural Education*

The teachers of Vocational Agriculture during the past biennium have made a concerted effort to improve the economic and social conditions of the farm families in Florida through instruction given in all types of Vocational Agriculture classes. The teachers of Vocational Agriculture during the year ending June 30, 1940, reached 5,866 in-school pupils through all-day and day-unit classes and 2,400 out-of-school pupils in part-time and evening classes, making a total of 8,266 persons reached in organized instruction.

Among other objectives in the program of work of the teachers of Vocational Agriculture was the objective to acquaint farmers with the services available to them through the various Federal agencies. By acquainting the farmers with the services of these agencies the teachers of Vocational Agriculture were not only cooperating with the other governmental agencies interested in helping the farmer but at the same time were rendering the farmer himself a real service. Outstanding in the services rendered in the State which will materially improve the living conditions for farm families, has been the help which the teachers have given in the establishment of Rural Electrification Cooperatives which have, in turn, made possible modern conveniences in the farm homes.

Each pupil taking instruction in Vocational Agriculture carried out on his home farm a supervised farming program under the supervision of his Vocational Agriculture teacher. Accurate and up-to-date records were kept by each pupil, using the uniform project record book which has been adopted for use throughout the Southern Region. For the fiscal year 1938-39 the labor income of \$545,123.65 from pupils' supervised farming programs exceeded the cost of instruction by \$424,036.38. For every dollar of State and Federal funds invested in teachers' salaries during the fiscal year 1938-39, the return shown by the pupils' labor income from supervised farming programs was \$4.50.\*

---

\*Figures for 1939-40 not yet available.

The teacher-training work for white teachers of Vocational Agriculture is carried on at the University of Florida and for Negroes at the Florida A. & M. College. In addition to the resident teacher-training programs, programs for the further training of teachers in service are carried out through means of special courses offered during summer schools, individual visits to teachers on the job, and district and State conferences for the professional improvement of teachers in service, which are called by the State Supervisor and participated in by the teacher-training staff.

Through the monthly News Letter, published by the State Department of Education, and the Professional Improvement Bulletin, published by the teacher-training department at the University of Florida, the teachers of Vocational Agriculture are kept up-to-date and given pertinent information with regard to their work as well as being furnished the latest technical agricultural information and teaching helps.

The Florida Association, Future Farmers of America, has continued to hold up its high standards of achievement as a direct result of each local chapter's planning and carrying out local chapter programs of work based on the State Association's and the National organization's programs of work. As an indication that the standards have been maintained, the Florida Association ranked fifth among the State Associations in the United States during 1939.

The 1939 National Future Farmer Public Speaking Contest was won by Wayne Poucher of Largo, Florida, past Secretary of the Florida Association, F. F. A., who spoke on the subject, "Soil Conservation—Man's and Nature's". In addition to the honor of winning this contest, Wayne received a cash award of \$250.00. Our F. F. A. poultry judging team from Florida won first place in the Poultry Judging Contest at the Seventh World's Poultry Congress held in Cleveland, Ohio, in August, 1939. Newton Metzger of Hawthorne, a member of the team, was the high-ranking individual in the entire contest.

The Florida Association, F. F. A., has continued to sponsor, during the biennium, the following worthwhile activities: (1) the making of transcribed monthly radio programs at WRUF, Gainesville, and broadcasting over that station and five other key stations in the State; (2) the printing of a sixteen-page magazine, "The

Florida Future Farmer'', a copy of which goes to each active member of the State Association; and (3) F. F. A. Day which is held as a feature of the Florida State Fair in Tampa on the first Saturday of the Fair. On F. F. A. Day in 1940 Mr. W. A. Ross, Executive Secretary, F. F. A., and Specialist in Agricultural Education of the U. S. Office of Education, was an honor guest of the organization.

The Florida Association, New Farmers of America, (the organization for Negro farm boys studying Vocational Agriculture) made a commendable record of achievement during the biennium as indicated by the fact that Lester Albert of Delray, Florida, has served as Vice-President and President of the National organization; members of our State Association judging team have placed first in judging Irish potatoes and hogs in the National judging contests; and the quartette from Ocala, representing the Florida Association at the National Convention last year, was awarded first place and participated in a special N. F. A. broadcast over N. B. C. The N. F. A. judging team from Florida participating in the N. F. A. Poultry Judging Contest at the Seventh World's Poultry Congress in Cleveland in 1939 was rated "Excellent".

Housing facilities for Vocational Agriculture departments in the State have been improved through building classrooms and farm shops with the cooperation of the W. P. A. and the N. Y. A. Even though great progress has been made, there is still a need for additional housing facilities and equipment in a number of departments.

During the fiscal year 1939-40 the average teacher of Vocational Agriculture in Florida taught 5.1 different Vocational Agriculture classes, including all-day, day-unit, part-time, and evening groups. Based on a statement contained in Miscellaneous 2345 of the U. S. Office of Education, dated April 15, 1940, the average teacher of Vocational Agriculture in the United States taught 4.29 different classes. This is evidence that the teachers of Vocational Agriculture in Florida are carrying a proportionately heavier teaching load than teachers in other States. Although our Florida teachers are carrying a heavier teaching load, our records indicate that this does not interfere with the efficiency of their programs, based on the fact that we have a small turnover in our teaching personnel from year to year and, further, the fact that we continue to receive more

applications for departments of Vocational Agriculture than we can approve, due to lack of funds. The greatest need for the ensuing biennium is an increase in State appropriations for Vocational Agricultural Education, which will make possible the establishment of Departments of Vocational Agriculture in counties which do not now have these programs and the establishment of additional programs needed in counties which already have a program.

### *Vocational Rehabilitation*

The purpose of Vocational Rehabilitation Service is to prepare physically handicapped young men and women and physically handicapped adults to engage in remunerative employment. Such persons are given guidance in the selection of vocations in which their disabilities will not prevent employment. The more than one thousand cases of physically disabled persons who have been rehabilitated by this Department prove that a physical disability need not debar individuals from earning a livelihood. They also demonstrate the value of individual guidance, training and placement services.

Vocational Rehabilitation is a service that requires much individual attention. Each applicant must be carefully studied in order to determine his capacities as well as his limitations. Naturally, disabled persons present many personal problems which must be overcome if they are to be prepared for employment. Training is often difficult to find and must frequently be given on an individual basis. The Rehabilitation Counselor, or Caseworker, must have an intimate acquaintance with all of his clients and must give constant supervision to their preparation for employment.

In age the rehabilitants range from below eighteen to above sixty years. Their handicaps cover more than fifteen major classifications. Among these are the blind, the deaf, the hard of hearing, the crippled, and the tuberculous. The disabilities resulted from accident, disease, and congenital deformities. Some of the rehabilitants are responsible for four or more dependents.

During the biennium several steps were taken which will greatly aid in improving the Vocational Rehabilitation Services.

The enactment of the Florida School Code strengthened and liberalized the laws under which the service is conducted. The pro-

visions of these laws and a recent ruling of the United States Office of Education now permit the use of Rehabilitation Funds for the payment of living expenses for needy trainees who cannot provide their own living expenses. This will be a great help in the case of trainees from rural counties.

Another helpful step was the arrangement for active cooperation by the Compensation Division and the Employment Service of the Florida Industrial Commission, the State Sanatorium for the Tuberculous, and the Florida Crippled Children's Commission in the vocational rehabilitation of their clients who can profit by the services of the Rehabilitation Section.

The following brief summaries indicate the accomplishments of the past two years in Vocational Rehabilitation.

During the fiscal year ending June 30, 1939 the Rehabilitation Section had an enrollment of 1074. Of these 290 were prepared for employment, 221 were employed by the end of the year, and the cases of 164 were closed as rehabilitated. Fifty-seven cases were closed as non-feasible. The others were receiving one or more of the following services; guidance in selecting a vocation, training for a job, artificial appliances, supervision while getting established in a job or aid in getting employment. During the fiscal year ending June 30, 1940, the Rehabilitation Section had an enrollment of 953. Of this number 262 were prepared for employment by the end of the year; 225 were employed and the cases of 179 of them were closed as rehabilitated. All of the others were receiving one or more of the following services; vocational guidance and case study to determine their needs, fitting of artificial appliances; training for a job, aid in finding a job, or supervision while getting established in a job.

The Rehabilitation Service is now established on a firm basis. Federal and state laws and regulations are fairly adequate to permit an effective service. But because of the rapid growth of our state, the great number of accidents which disable our people, the disabling effects of diseases, the number of persons needing Vocational Rehabilitation Service is rapidly increasing. For these reasons the amount of state funds should be increased in proportion to the needs of the increased number of handicapped persons. Federal funds available for the next biennium are estimated as \$50,000 annually. It is recommended that Florida match this amount.

A serious handicap in rehabilitation results from the lack of adequate educational facilities for crippled and disabled children unable to attend regular school classes. A few counties are beginning to meet this problem but there is great need of state help. If seriously handicapped children do not obtain a good general education they cannot be rehabilitated and will be dependents. On the other hand, if well educated many of them become independent.

### *Home Economics Education*

A study of the accomplishments of the program of Home Economics education in Florida shows advancement along many lines during the biennium which ended June 30, 1940. Home Economics has participated in the cooperating school movement in the State. Home Economics teachers have made a valuable contribution in the study of home and community problems. A Home Economics consultant has been provided on the curriculum staff during the summer workshops at both Florida State College for Women and the University of Florida. Each worked with faculty groups of the cooperating schools on their particular school problems.

The number of day schools offering either general or vocational programs in Home Economics has increased from 281 to 306. Applications for additional vocational programs have far exceeded the funds available for expansion.

The program for adults and out-of-school youth has expanded appreciably. Particularly is this true in the larger centers of the State. Evidences of this expansion are shown by the increased enrollments, by the increased number of requests for courses, and by the wide variety of course offerings.

The gratifying number of Florida schools have improved their facilities for teaching Home Economics either by building and equipping new departments or by remodeling existing obsolete "laboratory" departments. The result is a greater number of more homelike and attractive departments which lend themselves to home-making experiences more nearly approaching real home situations. Fifty plans for departments have been drawn, 130 blueprints and 768 details for cabinets have been furnished schools through the cooperative service of the State School Plant Planning Staff and the State Supervisor of Home Economics Education.

Teachers have made surveys of their communities. These surveys have brought into relief teaching problems not recognized before. In this way, the school program has been related more closely to community needs. Teachers have attempted to coordinate their programs with those of other agencies interested in home and family life.

In 1939-1940, there were 17,000 home projects completed. This would indicate that there is some carry-over into the homes of the pupils.

Student Home Economics Clubs have shown a marked increase in numbers. The attendance of club members at the State meetings has doubled.

Teachers have demonstrated their professional interest by their participation in sectional conferences. Eighty-six per cent of the Home Economics teachers attended the sectional conferences held in seven centers in the State.

*Florida State College for Women.* During the biennium, offerings in the school of Home Economics have been increased considerably. Advanced courses in Housing, Consumer Buying, Family Finance and Family Relationships have been added. Graduate offerings have been greatly increased. During the summer sessions, courses to meet the particular needs of Home Economics teachers have been offered by regular staff members and visiting instructors with the cooperation of the State Department of Education. Outstanding among these was a course in Developing a Functioning Program in Home Economics directed by the Southern Regional Agent of the Home Economics Education Service, Office of Education, and a course in Nutrition Problems of the School Child offered by the eminent nutritionist, Dr. Mary Swartz Rose.

The number of Home Economics Education majors has increased about forty per cent. The increase in the number of graduate students majoring in Home Economics has been even greater.

The addition of an assistant teacher-trainer and of a supervisory teacher at the Florida High School has made possible more adequate supervision of teachers in training and a closer follow up of graduates.

The Home Economics programs in the training centers have been expanded. Some home economics work is being taught in all grades above the first in the Demonstration School of the College. Both training centers have been improved in appearance and convenience.

More opportunities for home visiting and for participation in school and community activities have been provided for student teachers. The School of Home Economics has offered assistance to teachers in-service by participating in district conferences, by furnishing leaders at meetings of the Home Economics section of district educational associations, by visiting schools, and by organizing both undergraduate and graduate courses in the regular and summer sessions with specific needs of Florida teachers in mind.

*Florida Agricultural and Mechanical College for Negroes.* This past biennium, the staff of the School of Home Economics has placed greater emphasis on improved homemaking practices, more home-like departments, better prepared teachers, and closer supervision and follow-up of teachers in service. They have emphasized the importance of discovering the needs of the local community in which one teaches. They have provided more vocational experiences for prospective teachers through home visits and projects, and through experience in inaugurating and participating in adult programs. More observation of teaching in nearby public schools has been made possible for senior students in Home Economics.

The itinerant teacher-trainer has assisted in the supervision and in-service training of teachers through the use of individual guidance, and through group, district, and state conferences. The results obtained have been used as problems of study by the class in Methods of Teaching Home Economics at the College.

In response to requests by Home Economics teachers, short intensive courses in Consumer Education, Housing, and Arts and Skills in Homemaking have been offered to teachers during the summer sessions by visiting instructors with the cooperation of the State Department of Education.

### *Trade and Industrial Education*

Requests from local communities for Trade and Industrial Education services have steadily increased throughout the biennium.

Many of these requests during the last half of the biennium had to be denied because State funds with which to aid in the conduct of the instructional phase of the training were not available.

The major efforts of the State Department of Education during the past two years have been in the improvement of instruction, the development of instructional material, and the securing of more substantial support for training from local boards of public instruction in the way of more adequate training facilities. Much has been accomplished along these fronts. Even though no more funds from State sources for subsidy to the local communities have been available, local funds expended for Trade and Industrial Education have increased 25% over the previous biennium with an increase of over 300% insured for the first half of the new biennium.

The National emergency has given a tremendous impetus to Trade and Industrial Education services. The scarcity of skilled craftsmen in occupations essential to the National Defense and the imperative need for training and training facilities have placed Trade and Industrial Education of equal importance with munitions and the Selective Service. The responsibility for training has been delegated to the public schools, and Florida has responded to the call by placing more than 1800 civilians and enlisted men in training in the various Trade and Industrial programs over the State, more than 600 of whom have been placed in employment during the first six months of the new biennium.

Six new vocational schools at an aggregate value of \$3,500,000 have been constructed or are under construction with the turn of the biennium. These new vocational schools are all a part of local school systems and reflect to some degree the extent to which the Trade and Industrial Education service has progressed during the biennium just closed.

#### *Distributive Education*

Distributive Education, a comparatively new vocational service as far as Federal subsidy is concerned, has had a remarkable growth in Florida during the three years it has been available. The number of individuals availing themselves of this service was quadrupled during the first year of the biennium and this figure was doubled during the last year. This service, offering training to those pre-

paring for or engaged in retailing, wholesaling or merchandising, has not yet reached a significant number of our people interested in these occupational pursuits. The five thousand individuals taught during the past year are only a small part of the number who are engaged in selling.

The major emphasis during the biennium has been in training personnel needed to reach larger numbers and in the development of instructional material to be used by this personnel. The University of Florida through its School of Trade and Industrial Education has contributed materially to the development of qualified teachers for this service. The State has now a trained Coordinator in the five Congressional districts of the State whose duty is to organize and teach Distributive Education courses, as well as to train promising teachers in their respective areas for future service in this program.

It is expected that with the present organization, the Distributive Education program of training in Florida will develop very rapidly during the next biennium.

#### SCHOOL BUSINESS ADMINISTRATION

During the biennium, increased emphasis has been placed on school business administration and on improving school business administrative procedures. Considerable attention has been given to school budgets, and the budgets of most counties now seem to be well-prepared and reasonably well suited for guidance in carrying out the county program. Practically all counties have been scrupulous in observing fully the terms of the Budget Act. Counties which have encountered difficulties have been given assistance where possible so that the terms of the Budget Act might be fully carried out. It may safely be said that the practice of creating obligations that exceed the budget appropriations has now been eliminated. The chief problem, therefore, as far as indebtedness is concerned, will be to work out some practicable plan for retiring the indebtedness in those counties which, during prior years, incurred large indebtedness against the County General School Funds. Such steps have already been worked out in a few counties, but in other counties the indebtedness is so large that there seems to be no immediate solution in sight.

Most counties have been able to put their business procedures on a sounder operating basis so that they are now receiving more for their school expenditures than at any previous time.

### DISTRICT CONFERENCE PROGRAM

The policy of submitting suggestions and proposals to the leaders of the state at district conferences has been continued during the biennium. Such conferences have been held each fall and each spring, and the results have been very encouraging. Many valuable suggestions have been received in the field, and the entire program has been developed on a democratic basis with full opportunity for participation of all school leaders. Trustees and county board members, as well as county superintendents and principals, have participated in these conferences.

The district conference procedure has been of great help in interpreting many of the bulletins and handbooks which have been prepared during the biennium, as well as in deriving suggestions for future projects. It is planned to continue the district conference procedure as long as there are any important matters to be discussed at such meetings.

### BULLETINS ON SCHOOL ADMINISTRATION

Problems in the field of school administration are ordinarily not easy to solve. If much progress is to be made in Florida, teachers, principals, and others who are interested in improving the schools must give direct attention to the problems and to the development of solutions. Faculty groups and others should be just as much concerned with the improvement of administration as with the improvement of instruction in order that they may be in a position to help to remove handicaps to the solution of their immediate instructional problems.

The following handbooks and bulletins were prepared by the Florida Work-Conference during the summer months and are now in process of publication. The comments on each of the handbooks listed below will indicate the materials covered and the groups to whom those materials should be of major interest.

*Handbook for School Plant Operation and Maintenance in Florida, Bulletin No. 13*

*Scope and Contents.* This handbook attempts to provide important information needed by county superintendents, principals, and custodians to effectively operate and maintain public school plants. The handbook includes chapters dealing with the following subjects: administration of school plant; operation and maintenance service; duties of custodian and preparation of a work schedule; the planning and care of school grounds; housekeeping; school plant maintenance; mechanical systems; records and reports relating to operation and maintenance.

The following is taken from the introduction on "Suggestions for Use of the Handbook":

**"County Superintendents.** This book should be serviceable to county superintendents in making recommendations for the adoption of policies by county boards, in the organization of maintenance services, and in the selection and recommendation of personnel for operation and maintenance of school plants. . . .

**"Principals.** The handbook may be used to good advantage by principals in the preparation of custodial work schedules and in delegating responsibilities. . . . It will help principals to recognize deficiencies more readily and suggest methods of correcting them.

**"Custodians.** The handbook will serve as a guide to good practices and methods which will enable custodians to select the most effective procedure for each job and enable them to save time and materials. . . ."

*Distribution.* This handbook is available for free distribution to superintendents and to principals of three-teacher or larger schools. An additional copy will be provided for schools having a full-time custodian.

*Transportation of Pupils to the Public Schools of Florida, Bulletin No. 14*

*Scope and Contents.* This handbook is a continuation of the study initiated by the Southern States Work-Conference committee on pupil transportation. It has been prepared to aid the Florida school administrator with his transportation problems. Some of the content is repeated from the Southern States Handbook, but most of the material has been prepared to meet the peculiar needs of pupil transportation in Florida. The handbook contains three

parts: policy formation and administration; laws and regulations; and statistical data and record forms. Part I is devoted to a discussion of principles of operation, maintenance, and purchase of equipment. Part II embodies (1) the laws relating to transportation, with citations from court decisions and Attorney General's opinions; (2) the rules and regulations of the State Board of Education; and (3) the State Board of Education standards and specifications for school bus construction. Part III includes analyses from the county superintendents' annual reports, tabulations and charts, and suggested forms for use in the transportation service.

*Providing Better Teachers for Florida  
Schools, Bulletin No. 15*

*Scope and Contents.* This handbook was developed by Florida teachers during the progress of the Southern States Work-Conference at Daytona Beach and the Florida Work-Conference at Gainesville. It delineates many of the administrator's problems in teacher selection and placement and suggests desirable practices which will help to overcome difficulties in personnel management. Problems of enlisting and educating teacher personnel and problems of professional stability and growth, as well as the more practical problems of actual selection and placement, are faced candidly, and practicable solutions have been suggested. Considerable attention is given to the matter of improving procedures for selecting teachers and for seeing that they are well oriented in their work. The bulletin should prove invaluable to school administrators.

*Continuity of Service for Teachers  
in Florida, Bulletin No. 16*

*Scope and Contents.* This bulletin was prepared by a committee of teachers and principals of Florida after an exhaustive study of issues and practices throughout the United States. The recommendations of the committee, before being published in tentative form, were approved by an advisory committee consisting of county board members, county superintendents, trustees, principals, and teachers.

The following subjects are discussed in the bulletin: point of view, principles relating to improving conditions of service, trends and recent improvements, problems being faced at the present time, a revised code of ethics, improvements in policies and practices, the

organization and functions of ethics committees, and suggested improvements in laws.

*Distribution.* At least one copy of this bulletin will be available to each school without cost. This material as already published in the *Journal* should be carefully studied by all principals and teachers throughout the State.

*Handbook for County School Board  
Members, Bulletin No. 17*

*Scope and Contents.* This handbook is intended to help county board members and those who work with county boards understand just how the board can best function. Considerable attention is given to the matter of policy formation since that is the first function of the county board. Policies established by the county board can help to bring about good schools or can seriously handicap the schools in any county. A chapter is devoted to an explanation of just how a county board should go about the process of formulating policies.

Other chapters deal with specific duties and responsibilities of the county board in the various fields. In each chapter is a list of best policies which should be very helpful to county boards in reaching wise decisions regarding problems which arise.

*Distribution.* One copy will be given to each county board member and to each county superintendent. As long as the supply lasts, principals may obtain copies on request.

*Handbook for School District  
Trustees, Bulletin No. 18*

*Scope and Contents.* This handbook attempts to provide all information needed by trustees in order that they may function effectively as contemplated by law. It attempts to make clear what trustees should and should not do. It provides information that also should be in the hands of principals, because they need to know how to work effectively with trustees. The handbook includes chapters dealing with the following subjects: the position of trustees; duties and responsibilities; organizations and meetings and term of office; relationship to the county superintendent; relationships to the principal; selection of principals, teachers and other personnel; finance and taxation; school district elections.

The following is taken from a letter of introduction: "The schools exist for the benefit of the children, not for the benefit of trustees, teachers, school officials, or any other group. Practices which are found to be for the best interest of the children are the practices which should be followed. The recommendations in this handbook are based on experience throughout the United States and on the best information available in the field. Patrons and school officials have a right to expect their trustees to follow such suggested practices and procedures until new and better information becomes available."

*Distribution.* One copy will be made available to each trustee and one copy to each principal of a three-teacher or larger school in the State.

*Handbook for County Superintendents,  
Bulletin No. 19*

*Scope and Contents.* This handbook is intended to help county superintendents to determine their duties and functions. It discusses fully the problem of relationships with various groups and centers attention particularly on what is termed "best practices." In each field in which the county superintendent is expected to function, there is presented a list of "best practices" which, in effect, tells county superintendents that they should follow those practices or have a good reason for following some other practice.

*Distribution.* One copy will be given to each county superintendent and one to each county board member. Copies may be obtained by principals upon request.

*Principals' Handbook,  
Bulletin No. 20*

*Scope and Contents.* Policies and practices followed by principals of various schools frequently differ greatly. Sometimes this difference is justified; sometimes it is based on differing theories which cannot be supported in practical application.

The *Principals' Handbook* includes chapters devoted to developing the school program, the school and the community, the principal's relationships to the district, county, and State, the principal and faculty relationships, the instructional program, the principal's responsibility for the school plant, the principal's responsibility in

transportation, and the principal's responsibility in business administration.

*Distribution.* One copy will be made available to each principal and to each county superintendent in the State.

*Continuity of Service for Teachers  
in Southern States*

*Scope and Contents.* This is one of three publications prepared by committees of the Southern States Work-Conference in June, 1940. A Florida committee collaborated in the preparation.

The bulletin first discusses the problem of continuity of service for teachers in southern states and points out that better protection is generally accepted as desirable. A number of important principles are stated and explained. Following this statement of principles comes a discussion of the problem of improving continuity of service by improving practice. Then comes a discussion of improving continuity of service through legislation.

*Distribution.* Copies of this bulletin are available at 10c each.

*Handbook for School Plant Operation  
and Maintenance in Southern States*

*Scope and Contents.* This handbook parallels the Florida handbook. It is intended to be used to provide materials in the field which will be helpful throughout the southern states.

*Distribution.* This handbook may be obtained for 25c per copy.

*Pupil Transportation for  
the Southern States*

*Scope and Contents.* This manual for transportation comprising 87 printed pages was developed as a cooperative enterprise by official school representatives from twelve southern states. Its content is devoted to problems of organization and management; rules and regulations; records, reports and information; insurance; personnel; routes and schedules; maintenance; and purchase procedures. In addition, the manual contains four appendices giving suggested forms for use in purchase, contract, reports, and accounting.

*Distribution.* The bulletin is available for distribution at 25c per copy. It is being widely distributed and used among the southern states which participated in the Southern States Work-Conference last June.

## ANALYSIS OF STATE SUMMARIES

## SUMMARY OF ANNUAL TRANSPORTATION REPORTS 1939-40

<b>1. The School Bus Driver:</b>			
Total Number of Drivers.....	1428		
Average Age.....	37		
Number of Women Drivers.....	106		
Number of Pupil Drivers.....	63		
Number of Negro Drivers.....	49		
<b>2. Number and Ownership of Busses:</b>			
Chassis: County Owned.....	687		
Privately Owned.....	726		
		1413	
<b>Bodies:</b>			
County Owned.....	971		
Privately Owned.....	442		
		1413	
<b>3. Bus Miles Traveled one way (In Morning):</b>			
On Hard Surface.....	15,595 Miles	53.3%	
On Dirt Grade.....	11,563	39.4	
On Ungraded Roads.....	2,162	7.3	
Total Bus Miles One Way.....	29,320 Miles	100. %	
Miles Traveled with Passengers.....	25,382	86.7%	
Miles Traveled without Passengers.....	3,920	13.3%	
<b>4. Construction of Bus Bodies:</b>			
All Steel.....	1,090	76.3%	
Composite.....	259	18.1%	
Wood Frame.....	79	5.6%	
<b>5. Average Monthly Contract Rate:</b>			
Of Contract Busses Only.....			\$71.52

<b>6. Average Monthly Salary of Drivers:</b>			
On County Owned Busses Only.....			\$43.77
<b>7. Liability Insurance (Maximum Protection Average per Bus):</b>			
One Child.....			\$ 5,110
Entire Load.....			\$31,631
<b>8. Per Cent of Transported Pupils by Departments:</b>			
Elementary.....		57.3%	
Junior High.....		23.5%	
Senior High.....		19.2%	
<b>9. Miscellaneous Statistics:</b>			
Average Age of Bus Chassis.....			5 years
Average Age of Bus Bodies.....			4 years
Average Wheelbase of Busses.....			168 inches
Average Body Length.....			17 feet
Average Body Width (Outside).....			86 inches
Average Body Height (Inside).....			62 inches
<b>10. Bus Seating:</b>			
Per Cent of Side Facing Seats.....			81%
Per Cent of Forward Facing Seats.....			19%
Average Number of Seats per Bus.....			45
<b>11. Provisions for Isolated Pupils Not Transported by Regular Busses:</b>			
Number of Pupils Served by Small Busses and Private Cars.....			1245
Number of Pupils Served by Public Utilities.....			316
Assistance in lieu of transportation—			
Number of Pupils.....			236
Average Cost per Pupil per Month.....			\$3.60

## ANALYSIS OF STATE SUMMARIES

## VOCATIONAL HOME ECONOMICS

	1938-39			1939-40		
	White	Negro	Total	White	Negro	Total
VOCATIONAL HOME ECONOMICS:						
(a) Day School:						
Number of Teachers.....	95	46	141	97	49	146
Pupils Enrolled.....	4,721	3,742	8,463	5,108	3,112	8,220
Total Reimbursement.....			\$ 72,252.40			\$ 75,145.68
(b) Part-Time Schools:						
Number of Teachers.....	5	1	6	6	1	7
Pupils Enrolled.....	562	117	679	1,798	40	1,838
Total Reimbursement.....	\$ 3,301.23	\$ 141.84	\$ 3,443.07	\$ 5,202.69	\$ 183.37	\$ 5,386.06
(c) Evening Schools:						
Number of Teachers.....	21	20	41	35	21	56
Pupils Enrolled.....	3,055	1,189	4,244	2,878	1,149	4,027
Total Reimbursement.....	\$ 4,410.72	\$ 1,045.39	\$ 5,456.11	\$ 5,871.36	\$ 1,213.90	\$ 7,085.26

## VOCATIONAL TRADE AND INDUSTRIAL EDUCATION

	1938-39	1939-40
VOCATIONAL TRADE AND INDUSTRIAL EDUCATION:*		
(a) All-Day Trade Schools:		
Number Teachers.....	40	42
Pupils Enrolled.....	1,197	1,304
(b) Evening Trade Schools:		
Number Teachers.....	128	127
Pupils Enrolled.....	4,231	3,931
(c) Part-Time General Continuation Schools:		
Number Teachers.....	96	82
Pupils Enrolled.....	6,127	5,292
(d) Part-Time Trade Extension Schools:		
Number Teachers.....	55	40
Pupils Enrolled.....	1,403	1,077
Total Reimbursement All Programs.....	\$ 122,079.01	\$ 118,753.80

\*-In addition to the teachers reported, there were 12 Coordinators and Supervisors for the year 1938-39 and 14 for the year 1939-40.

## VOCATIONAL DISTRIBUTIVE EDUCATION

	1938-39	1939-40
DISTRIBUTIVE EDUCATION:		
Number Teachers.....	62	92
Pupils Enrolled.....	2,266	4,503
Reimbursement.....	\$ 9,758.00	\$ 13,789.76

## ANALYSIS OF STATE SUMMARIES

### VOCATIONAL REHABILITATION

Expenditures for the Fiscal Years July 1, 1938 to June 30, 1939, and  
July 1, 1939, to June 30, 1940

	1938-39	1939-40
I.		
A. Administrative:		
1. Salary and Travel of Supervisor.....	\$ 4,772.13	\$ 4,734.18
2. Salaries of Clerks.....	2,580.00	3,230.19
3. Communication, Publications and Publicity, Supplies, Office Equipment.....	891.24	1,784.53
Total.....	\$ 8,243.37*	\$ 9,748.90†
B. Case Production Service		
1. Salaries of Vocational Rehabilitation Counselors, Teachers, Instructors, and Travel of Counselors....	\$ 36,382.94	\$ 34,887.41
2. Instructional Supplies, Transportation of Trainees, Artificial Appliances, Medical Examinations, Maintenance of Trainees, and Miscellaneous....	13,653.91	14,441.69
Total.....	\$ 50,036.85	\$ 49,329.10
Total Administrative and Case Production Expenditures.....	\$ 58,280.22	\$ 59,078.00
II.		
A. Summary of Expenditures According to Source:		
1. Federal Funds.....	\$ 27,697.71	\$ 32,394.93
2. State Funds.....	30,209.99	26,683.07
3. Donated Funds.....	372.52	
Total.....	\$ 58,280.22	\$ 59,078.00
B. County Expenditures for Vocational Rehabilitation not Re- imbursed by State and Federal Funds.....	6,057.46	6,143.66
Total Expenditures of Federal, State, and County Funds for Vocational Rehabilitation.....	\$ 64,337.68	\$ 65,221.66

\*-Of this amount \$942.19 was for reimbursement of expenditures of 4 counties in which local Rehabilitation Services were conducted.

†-Of this amount \$1,629.04 was for reimbursement of expenditures of 5 counties in which local Rehabilitation Services were conducted.

### RECAPITULATION OF EXPENSES FROM TEXTBOOK FUND

	1938-39	1939-40
CURRENT EXPENSE:		
Salaries and Per Diem:		
Courses of Study Committee.....	\$ 150.00	\$ 160.00
Textbook Rating Committee.....	630.00	
Exchange Warehouse Salaries.....	2,400.00	2,675.00
Clerical Service and Labor.....	232.03	176.45
Total.....	\$ 3,412.03	\$ 3,011.45
Travel and Sustenance:		
Courses of Study Committee.....	\$ 173.80	\$ 250.55
Textbook Rating Committee.....	288.90	
State Department Education.....	900.73	900.10
Total.....	\$ 1,363.43	\$ 1,150.65
Incidental Administrative Costs:		
Freight and Express.....	\$ 5,294.75	\$ 2,688.47
Advertising.....	13.50	
Printing.....	2,530.56	1,858.30
Rent.....	700.00	900.00
Office Expense.....	252.63	492.65
Total.....	\$ 8,791.44	\$ 5,939.42
Care of Textbooks:		
Textbook Fumigation.....	\$ 25.00	\$ -
Textbook Renovation.....	11,888.37	4,899.26
Total.....	\$ 11,913.37	\$ 4,899.26
Total Current Expense.....	\$ 25,480.27	\$ 15,000.78
CAPITAL EXPENDITURES:		
Furniture and Fixtures.....	\$ 1,079.81	\$ 69.85
Textbooks:		
Distributed during Year.....	447,722.73	206,274.29
For Exchange Distribution.....	5,853.43	
For 1940-41 Distribution.....		387.48
Total Capital Expenditures.....	\$ 454,655.97	\$ 206,731.62
Grand Total Expenditures.....	\$ 480,136.24	\$ 221,732.40

(1) Vocational refunds, State and Federal, are assumed to be equal in amount. Refunds for 1919-20 and 1924-25 taken from report of Director of Vocational Education.

(2) Prior to 1933-34 Taxes and Tax Redemptions were not reported separately.

(3) Includes Bond Interest and Sinking Fund receipts.

(4) Prior to 1933-34 District Support and Maintenance and District Interest and Sinking Funds were not separated. For the years 1924-25 to 1932-33, inclusive, these were divided on the basis of percentage levy for Debt Service and Maintenance against the total collection as reported by the County Superintendents.

(5) Includes Revenue Receipts reported under Bond Construction Funds.

(6) Prior to 1933-34 Non-Revenue Receipts from Support and Maintenance Funds, District Interest and Sinking Funds, and District Bond Construction Funds were not reported separately.

(7) Includes \$14,436.00 reported as Racing Commission Funds.

<b>TOTAL EXPENDITURES ALL FUNDS (3).....</b>	\$9,160,262	\$18,117,049	\$25,003,234	\$18,067,549	\$16,728,176	\$18,899,233	\$22,790,997	\$24,911,684	(\$ ) 25,883,578	\$25,847,313	\$25,167,310

(1) General Control not comparable with subsequent years because of change in classification of accounts.

(2) This amount could not be distributed among items of current expenditures for the reason that prior to 1929-30 present classification of accounts was not in use.

(3) Prior to 1933-34 disbursements from Support and Maintenance Funds, District Interest and Sinking Funds, and District Bond Construction Funds were not reported separately.

(4) Since 1937-38 accounts of funds for the Support and Maintenance of Schools have been on an accrual basis. EXPENDITURES for 1937-38 represent actual payments made during the year from funds for the support and maintenance of schools, plus unpaid obligations incurred during the year amounting to \$323,670.43 (vouchers unpaid), plus current loans unpaid at the end of the year amounting to \$250,556.43, plus obligations of previous years which had not been charged as expenditures until 1937-38 and which are estimated to be at least \$300,000. Thus disbursements from funds for the support and maintenance of schools for 1937-38 were approximately \$875,000 less than the recorded expenditures for that year. The 1937-38 disbursements for the support and maintenance of schools were, therefore, approximately \$19,996,000 - or nearly \$307,000 less than the disbursements from the support and maintenance funds during 1938-1937.

(5) Does not include other items such as Purchase of Investments, Liquid Investments, Frozen Balances, Transfers, etc., after 1937-38.

(6) Unreconciled difference—Receipts and Expenditures.

10. NUMBER SCHOOL DISTRICTS LEVYING TAX .....						853	850	844	837	826	823	

(1) Salaries reported prior to 1937-38 represent actual annual disbursements and in some years salaries contracted for were not paid in full. Since 1937-38 accounts have been on an accrual basis and amounts represent actual disbursements plus obligations incurred during the year. Amounts given for each year include salaries of Supervisors, Principals and Teachers.

(2) Prior to 1936-37 disbursements for transportation reported under Auxiliary Agencies included operation and new buses. Beginning with 1936-37 payments for new buses have been reported under Capital Outlay, and since 1939-40 Insurance has been reported under Fixed Charges.

(3) Amounts paid for new buses, reported under Capital Outlay, not included in current expenses after 1936-37.

(4) Original cost of school property estimated after 1936-37.

(5) Payments reported for Interest for 1929-30 to 1931-32 evidently include interest on bonds and time warrants, as well as current interest.

(6) Beginning with 1933-34 fees for Collectors and Assessors for Interest and Sinking Fund Taxes are included, but are not included after 1937-38.
